

GREETINGS from OAKWOOD DAFFODILS:**MARCH 2015**

Welcome to Oakwood Daffodils' 32nd annual listing of daffodils.

It is with great sadness that I inform you of the passing of Sandy Reed, my wife of 28 years. After only a year, the ravages of A.L.S. became too great for her to endure any longer. On February 2nd, with family and friends beside her, she died at home. A.L.S. is a horrible disease, and we are all victims of its ravages. Sandy was very courageous, to the end. All of your cards, letters, and calls have been tremendously appreciated.

With the untimely passing of Richard Havens, and with Mitsch Daffodils officially ceasing operations in 2014, I have decided to offer bulbs of Grant's that I had deliberately not offered in the past. As stocks allow I will offer them so we can continue to have these fine and sought-after varieties available in the U.S.A. I made extensive purchases of their final list to help complete this goal; however, it will take some time to bring the older stocks to saleable size. Patience is virtuous, so they say.

My assistant, Julie Martin, and her family continue helping with the daffodils, in all aspects, including now assuming many of Sandy's previous office duties. I greatly appreciate the many contributions Julie and her family have made. I would also like to thank Cindy Haeffner, who has hyperlinked this year's offerings to Daffseek.org. This should be very helpful in seeing what our flowers look like, at least for those with photographs on Daffseek.org. Simply move and hover your computer's cursor over the cultivar's name, and if a dialogue box appears just double-click your mouse and you will be re-directed to the photo page on Daffseek.org. Some computers may ask permission before taking you directly to the external link; approve, and enjoy the imagery provided.

I have trimmed last year's list to allow time to make available additional bulb planting space, especially for selected stock and four year-old seedlings. The possibilities of these young seedlings excite and drive me to further improve my current breeding program and to open new areas from that breeding. You will soon see these results, especially in the O-O and W-O seedlings. While small in numbers, my W-G seedlings are already exciting and providing at long-last consistent green cups.

We have started trials of some new methods for growing miniatures. Hopefully it will soon result in more miniatures becoming available for sale, even the scarce ones.

My Holy Grail of breeding, if you will, is the yet illusive O-W cultivars—yes, you read that correctly, orange petals with white coronas. As I put off this effort in the beginning of my career, I now have a lot of breeding (and luck!) to catch up on.

I wish to hear from our customers and the ADS membership about what you would like to see offered from Oakwood Daffodils, to make your hobby more enjoyable and to enable a more active and competitive role in the societies and at the shows. Help us grow to serve you better. In the meantime, please enjoy our overall reduced prices in this year's list. All of our bulbs are Midwestern-grown and acclimatized.

Best Wishes,

John Reed, D.O.

OAKWOOD DAFFODILS

2330 W Bertrand Road, Niles Michigan U.S.A. 49120

EMAIL: oakwooddaff@hughes.net

INSTRUCTIONS FOR ORDERING

1. All orders must be received by **July 1st, 2015** to be assured availability. **AFTER THAT DATE**, up until shipping has started, orders will be accepted and filled according to availability. You will receive an acknowledgment of your order as they are processed, either by e-mail or phone call if we have your e-mail address or phone number.
2. Please make checks payable to **OAKWOOD DAFFODILS**. We are sorry, but due to rising costs of credit card processing, we are unable to take any credit cards.
3. Bulbs will be shipped via USPS unless otherwise specified, so please include your COMPLETE shipping address. We are basing our shipping charges on the cost of the USPS medium flat-rate box. This has been our most common box size over the last few years. As usual, we always give gratis bulbs with your orders. For those smaller orders, we will give additional free bulbs to compensate for the additional shipping charge. If you have any concerns or problems with this please let us know. This is being done to simplify the shipping expenses to you. Overseas shipping will be billed at cost, plus the phytosanitary certificate and inspection fees.
4. Bulb shipments will hopefully be finished by the third week of September; sooner, if possible. Please specify if you require a particular shipping date and we will do our best to accommodate.
5. Visitors are welcome, but please make arrangements in advance to avoid disappointment due to variation in blooming or unfavorable weather.

TELEPHONE: (269) 684-3327

FAX: 269-684-0738

EMAIL: oakwooddaff@hughes.net

6. You will receive information about planting and care for your bulbs with your order. Please note that they should be in a location that receives natural rainfall and that does not puddle!
7. The format used in this catalog lists the daffodil's registered name first. This is followed by its classification and color code, then its hybridizer and country of origin. After the description, the pedigree (seed parent x pollen parent) is listed, then its flowering time, and then the price for each bulb.
8. As a professional courtesy to our dear colleague, we include in our listing a special list of bulbs offered by Larry Wier; you can find it at the end of this list. Larry personally oversees the growing, packaging, and posting of his own bulbs. Please send your order and payment, and any questions, directly to Larry via his contact information included on his order form. Thank you.

NEW INTRODUCTIONS for OAKWOOD DAFFODILS 2015

AMERICAN DOLLAR 3W-W (Dr. John Reed, USA)

A stand-out that is almost perfectly round, small, and very white. I had been calling it American Dollar but that name was not available. A definite intermediate with massive, overlapping and smooth perianth segments that incurve. They are on strong stems that show a well formed show flower. A vigorous grower. Was Reed Seedling 98-125-4

[Irish Mint x 85-26-1 (Angel x Misty Glen)] Late Season \$ 30.00

CULVER 3Y-Y (Dr. John Reed, USA)

This the second of the next generation bred from Haunting. This is much smoother and larger than Haunting. Similar but distinctive from Shiphewana that increases better. Named for a local town south of us in Indiana and home of Culver Military Academy. Petals are well rounded with excellent overlap and are silky smooth; poise stems are very good and strong. Was Reed Seedling 99-24-3

(Get Away x Haunting) Midseason \$ 40.00

FLORIDA ORANGE 2W-O (Dr. John Reed, USA) NAME PENDING

The first of the "near-trumpet" 1 W-O crosses to be released. This is a strong vigorous growing, well contrasted 2W-O with strong stems. The blooms are bright with a trumpet shaped corona of strong orange against the very white petals. Petals are overlapping, wide, and all in one plane the poise is excellent. Stock is still small. Was Reed Seedling 98-48-1

(Ivory Orange x Carrot Top) Early Midseason \$ 45.00

HERMANN 1Y-Y (Dr. John Reed, USA)

Consistency and perfection have been the hallmarks of this very nice yellow trumpet. Smooth, well balanced blooms supported by strong stems and well poised, with wide overlapping petals form the perianth. Color is a pleasing yellow, to both the petals and corona. Named in tribute to Joy and Cindy Haeffner's home town, in Missouri. Was Reed 88-34-12

(Phil's Gift x Dream Prince) Early Midseason \$ 20.00

JAW BREAKER 2W-O (Dr. John Reed USA)

This gigantic flower is held high on strong stems. The color is intense to its expanding corona of trumpet character. The perianth quality is more suited for the garden but can be shown. Petals are overlapping. Poise is good. When first seen by Jason Delaney, his mouth opened so wide, I thought his jaw would drop off, hence the name Jaw Breaker. Fertile, slower grower, and stock is still small. Was Reed Seedling 98-161-1

[81-125 (Poets Dream x Preamble) x Ivory Gold] Midseason \$ 50.00

JUERGEN 1Y-Y (Dr. John Reed, USA)

More praises have been given to this yellow trumpet than any other while growing in our field. Very consistent with a smooth overlapping perianth and a well-balanced trumpet. Strong stems with excellent poise. The Daffseek photo shows it growing in the field and is very representative of its form. Named to honor Juergen Steininger, a nurseryman who loves daffodils and is promoting them for the American market. as Reed seedling 96-63-1.

(83-40-4 x 84-7-4 [(Gold Bullion x Gold Convention) x (Golden Jewel x Dream Prince)])

Midseason \$ 40.00

MARIEMONT 1Y-O (Dr John Reed, USA)

This beautiful flower had been admired ever since it first flowered. It has been a healthy strong grower with smooth wide petals backing a very nice orange trumpet. A bulb sent to Jason Delaney was highly praised. It was the earliest 1Y-O to flower in 2014, and the blooms were long lasting. Location and seasonal variables can alter its quality. Named for a southern Ohio community interested in Oakwood's daffodils. Was Reed seedling 95-100-1.

[81-30-1 (Q20 x Sutton Court) x Uncle Duncan] Early Season \$ 14.00

MOTOWN 11aY-R (Dr. John Reed, USA)

While registered in 2009, it had to be renamed as hopeful Lickity Split was not accepted. I'm not sure if it was offered in 2009 but at least not under this name. So I'm re-offering it now. Due to oversight it has not been listed since. This cross was made to get an 11O-R and is very deeply colored. In a better climate it probably will be an orange-petaled flower. The corona is very dark and the plant is vigorous. While slightly coarse, it can be shown and it is smoother with wind protection and extra watering. It is a sight to see! Was Reed Seedling 98-54-3

(Menhay x Rory's Glen) Midseason \$ 14.00

LARRY'S FORCE 1W-O (Dr. John Reed, USA)

This represents a play on words. When it first flowered I thought this smaller 1W-O could provide Larry Force help in breeding miniature and intermediate W-O daffodils. From a cross of Y-O parents, this bright, well-formed 1W-O resulted, and it is quite startling. Jimmy Noone's very smooth perianth was transmitted to this flower. It has been a great increaser making it available now. The photo in the March journal is a young specimen and petal staining on the inner perianth resolves with time. Was Reed Seedling 2001-108-1 (NOTE: In the March 2015 ADS *Journal* Oakwood Daffodils advertisement, this is incorrectly listed as Larry's Force's, an error that we failed to catch before publishing.)

[(Jimmy Noone x 93-50-?) x (Hacienda x Q2O)] Early Season \$40.00

LUNAR DREAM 1Y-W (Dr. John Reed, USA)

This literally was a dream when I first saw it. Apparently a seed from a cross that was not harvested, germinated where it fell, next to its seed parent, Lunar Sea, which is very vigorous and healthy here. The blooms reversed over several days becoming a reverse bicolor. Strong stems support the medium large blooms, with an excellent poise. The perianth overlaps very well, forming a round flower that's truly a dream to look at. Was Reed seedling 2012 Lunar Sea x Unknown.

(Lunar Sea x unknown) Early Midseason \$ 30.00

OAKWOOD GLEN 2O-O (Dr. John Reed, USA) NAME PENDING

This is the first of the richly-colored, concolorous "almost-trumpet" orange trumpets to be released. Of trumpet character and a very vigorous grower, this fertile flower is being extensively used in IO-O crosses. The color is more copper than orange and is uniform rather than just a flush. Medium-sized with excellent stems and poise. Petals overlap well and are smooth. It's color at sunset is exquisite, its petals distinctly copper compared to neighboring yellows, golds, and oranges. Was Reed Seedling 2002-86-1

(Rory's Glen x Quantum Leap) Midseason \$ 30.00

SCRUMPTIOUS 2W-P (Dr. John Reed, USA)

This cross was my first to use the very smooth show flower from the (Valinor x Verran Rose) cross. Now registered Diana's Song, this cross yielded many distinctive and nice blooms with Millennium Pink pollen. Gerald Knehans was visiting during its maiden bloom. He was impressed as much as I was and a photo he took of it wound up in the ADS *Journal* later that year. Tall stems with excellent neck and poise show off the blooms that are large and round, with heavy substance and pure color. It was just scrumptious and the name stuck! A defining improvement in W-Ps at Oakwood. Very healthy and vigorous. Was Reed Seedling 2000-72-3

(Diana's Song x Millennium Pink) Midseason \$40.00

GENERAL DAFFOIL LISTING 2015

AL LAUREYS 3Y-R (Dr. John Reed, USA)

This is the finest deeply colored small cupped 3Y-R I have flowered. Of smaller size, the smooth flat perianth segments are positioned in the same plane with excellent poise. Named for Al Laurey's a friend that helped me so much with the daffodils for 10 years. Al was always there when I needed him. Though of slight build his heart was huge and the best! Was Reed 92-106-1. Stock is still small but growing well.

(Sabine Silk x Burning Bush ?) Late Midseason \$ 20.00

ALL AMERICAN 2W-P (Grant Mitsch and Richard and Elise Havens, USA)

Similar to Refrain but the corona is longer. Corona is variable in color which is more intensely pink or red in the best of seasons. Strong stems support the flower well. Petals overlap but not massively. They are smooth and in the same plane. Scarce

(Refrain x Magician) Late Midseason \$ 10.00

AMAZING GRACE 2W-P (B. S. Duncan, N. IRE) WITHDRAWN THIS YEAR**AMBERGRIS CAYE 1YYG-Y (John Pearson, ENG)**

A large unusually colored trumpet. Stems are strong but just medium tall. It is similar to its seed parent but more intensely colored. It is a show flower and breeder. It is very scarce with beautiful massive petal breadth and overlap.

(Clouded Yellow x Lemon Snow) Midseason \$ 12.00

AMERICAN COWBOY 2Y-R (Dr. John Reed, USA)

Peter Ramsay and I made this cross at about the same time. This is probably the best early well-formed and colored show flower that I selected from the cross. Held high with excellent poise and strong stems. The colors are quite intense. An improvement over both its parents. The photo I took can be seen on DaffSeek. Was seedling 98-1-1.

(Cowboy x Loch Lundie) **Early season** **\$ 44.00**

AMERICAN GOLD 1Y-Y (Dr. John Reed, USA)

A tall, robust, smooth yellow trumpet that shouts out that it is the best. Named for the Gold Medals won by American athletes in the last Olympics. Outstanding poise, overlap, smoothness, color and size make it easy to identify in the field. Was Reed 93-1-23.

(Celtic Gold x Dream Prince) **Early Season** **\$ 15.00**

AMERICAN HERO 2W-R (Dr. John Reed, USA)

9-11 and since has shown us the patriotism that our fire, police, medics and military give to our country and us on a daily basis. This flower is a bold statement of appreciation for their sacrifices. A truly unique daffodil with tall stems, large flowers with a long corona of dramatic coloring and poise. It is marvelous to view in a well-grown clump. For show and Garden. (I wish it could flower on the Fourth of July, too). Simply breath-taking! Was Reed 89-50-1.

Culmination x Ruby Red **Late Midseason** **\$ 6.00**

AMERICAN IDOL 2W-R (Dr. John Reed, USA)

This is that most vigorous selection from the cross of Quasar and Culmination. It is very healthy, free flowering with large flowers are displayed on tall strong stems. With its wide smooth flat perianth, it can be shown and is marvelous in the garden too, with its bright open red cup. Was Reed 93-10-4.

(Quasar x Culmination) **Early Midseason** **\$ 10.00**

AMERICAN POSSUM 3W-WPP (Dr. John Reed, USA)

This is the breeder for my best division 3W-Ps and 3W-Rs. It is from the same cross as Harold Cross's "Possum". It has a bigger flower and more rounded form in its perianth and cup. It transmits that form and the cups are always a true division three. It has generated deep pinks and intense carmine-red cups. Alas, it is a slow grower but healthy. It was Reed Seedling 86-10-1.

(Kerstin x Cascade) **Late Midseason** **\$ 15.00**

AMERICAN REVOLUTION 2Y-R (Bill Pannill and Dr. John Reed, USA)**WITHDRAWN THIS YEAR****AMERICAN SHOW GIRL 2W-P (Dr. John Reed, USA)**

A well-poised, tall, very smooth show flower. Considered my best show pink by many ADS Judges. Very healthy and a strong grower. Was Reed seedling 90-95-1.

(Fragrant Rose x Culmination) **Late Midseason** **\$ 10.00**

ARELEY KINGS 2W-GWW (J. S. B. Lea, ENG)

An excellent tall white show flower with smooth, chalky white wide petals and a long corona. It is vigorous and dependable here.

(Misty Glen x Croila) **Midseason** **\$ 4.00**

ASHTON WOLD 2W-W (John Pearson, ENG)

Many show awards in the UK. Beautiful flowers, here with vigorous growth, and tall strong stems.

(Stoke Charity x Panache) **Midseason** **\$ 6.00**

AT LAST 2W-R (Dr. John Reed, USA)

This was the best selection from the crosses made from Fragrant Rose x Culmination. It was also the latest flowering and the slowest to increase here, hence the name. Bright red open cups show well against very white, wide, smooth, overlapping petals and the flowers face upwards. Fertile. A must for late shows. Was Reed 90-95-2.

(Fragrant Rose x Culmination) **Late Season** **\$ 40.00**

BACK FLASH 2W-YYO (Dr. John Reed, USA)

An excellent flower for show and garden. Vigorous. It may exhibit an orange rim at times. Was Reed 81-21-1.

(Green Island x Flash Affair) **Midseason** **\$ 6.00**

BADBURY RINGS 3Y-YYR (John Blanchard, ENG)

An excellent show bloom, with a good record. Smaller bulbs, ample stock.

(Ferndown x Achduart) **Midseason** **\$ 5.00**

BANKER 2Y-O (David Jackson, AUS)

Consistently one of the most outstanding show daffodils with many Best in Show awards. The corona is usually more often a deep golden color than orange as it grows here. The petals are very smooth and overlapping with the entire flower being held upright with a strong stem.

(Scipio x Seedling) Midseason \$ 8.00

BARNESGOLD 1Y-Y (B. S. Duncan, N. IRE)

I prefer this of all of Brian's yellow trumpets. It is the parent of my best dark gold trumpet to date. Tall stems support rounded flowers with excellent poise.

(Golden Jewel x Midas Touch) Late Midseason \$ 5.00

BEAUTY REST 2W-P (Dr. John Reed, USA)

Registered in 2009 but has been neglected when preparing my catalog. Big blooms are held high on strong stems with excellent poise. The color of the corona is a very pure pink and the petals very white with good overlap and smoothness. A beautiful flower for show and garden. Was Reed Seedling 95-40-2

(Brian's Favorite x Lawless) Midseason \$ 8.00

BERCEUSE 2W-P (Grant E. Mitsch, USA)

For show and a fine garden plant. A strong grower and floriferous.

[(Melody Lane x Rose Caprice) x (Carita x Accent)] Midseason \$ 5.00

BERTRAND GOLD 2Y-Y (Dr. John Reed, USA) WITHDRAWN THIS YEAR**BIG MO 1Y-Y (Dr. John Reed, USA)**

The finest flower from a prolific small cross. Very smooth, large blooms verging on a subtle shade of orange as the flowers age. It has had good reviews from Ohio and New Zealand, too. Named for my father, M.O. Reed ("Mo") and the greatest United States battleship, The USS Missouri ("MO"). A top-quality show bloom. A slower increaser than its sibling, Dr. David Hough. Stock is still small. Was Reed 83-40-1.

(Gold Bullion x Gold Convention) Midseason \$ 8.00

BRIER GLASS 2W-GWW (John Lea, ENG)

A very white round early show flower. Parent of David Adams from Charles Wheatley.

(Ashmore x Croila) Early Midseason \$ 4.00

BROOMHILL 2W-W (F.E. Board, ENG)

Rarely offered now, this smooth, early, large cup is an outstanding show flower and breeder. Of medium size.

(Easter Moon x Knowhead) Early \$ 4.00

BUCHANAN 6W-GWW (Dr. John Reed, USA)

A lovely early all-white for show and garden. While it changes colors, it usually can be shown as an all-white. Named for the Michigan town that I first practiced in. Stock is still small, a slow increaser, but healthy. Was Reed 84-101-2

(Broomhill x *N. cyclamineus*) Early Season \$ 10.00

BURNING BUSH 3Y-R (B.S. Duncan, N. IRE)

A truly outstanding daffodil for the garden and show. Intense colors and long stems make it a standout. Proving to be a good parent and an excellent show flower. Makes smaller bulbs. My favorite Brian Duncan daffodil.

[(Rockhill x Bunclody) x (Altruist x Ulster Bank)] Late Midseason \$ 5.00

BUTLER UNIVERSITY 3Y-R (Dr. John Reed, USA)

Considered one of my best 3Y-Rs. It has **tall, strong** stems with excellent large show flowers. They are smooth with heavy substance and excellent poise. Was Reed 92-80-2.

(Kinsman x Suntory) Midseason \$ 12.00

BUTTER SILK 2Y-Y (Dr. John Reed, USA)

I was taken by this flower's bright yellow color and extreme petal smoothness when I first saw it, hence the name. It has excellent petal overlap and a strong medium length stem. Admired by Larry Weir at his place. It is giving excellent seedlings including my best ever pale 1Y-Y for show. Was seedling 92-22-1.

(Camelot x Dream Prince) Early Midseason \$ 11.00

CABERNET 2W-GPP (B.S. Duncan, N. IRE)

A seldom seen show flower with an unusual deeper shade of pink. It is breeding orange-pinks for me.

(Fragrant Rose x Pol Dornie) **Late Midseason** \$ 5.00

CAMEO GOSSIP 2Y-R (Spud Brogden, NZ)

Tall vigorous colorful. Can be shown at times. Limited Stock.

(Red Cameo x Kiwi Gossip) **Midseason** \$ 5.00

CAMEO KING 2W-W (Peter Ramsey, NZ)

WITHDRAWN THIS YEAR

CANTICLE 9W-GYR (Ballydorn Bulb Farm, N. IRE)

Excellent poet for show and garden. Very smooth and consistent.

(Cantabile x ?) **Late Midseason** \$ 7.00

CANDY BAR 2W-YOO (Colin Crotty, NZ)

One of Colin Crotty's most vigorous seedlings growing here. I love it! The stems are strong and support very smooth, outfacing blooms with a bowl-shaped corona.

(Breeding unknown) **Very Late Midseason Here** \$ 5.00

CANDY MAN 2W-R (Dr. John Reed, USA)

From the cross that gave American Hero, this daffodil is not formal enough for show but it beckons you with its intense color and tall stems, attracting people like a candy man does. Breeding intense color! Stock is still small. Was Reed 89-50-2.

(Culmination x Ruby Red) **Late Season** \$ 10.00

CAPTAIN AMERICA 2W-R (Dr. John Reed, USA)

Appropriately named for a super hero. Tall stems and wide petals are a foil for an amazing large deep red cup. It can be shown. Striking in the garden. Pollen is fertile and occasionally sets seed, too. See DaffSeek photos. Wind protection gives smoother, taller blooms. The red color fades with time, especially in the sun. Was Reed 95-5-1.

(Cordial x Magician) **Midseason** \$ 40.00

CARROT JUICE 10-O (Dr. John Reed, USA)

I could not take my eyes off this when it first flowered. While smaller than average its petals were a uniform shade of light orange. I could see no yellow in the petals with my eyes. This is not a suffusion or a sheen. While this is not a top show flower, it is showable at its best. It is a real color break and its color is being passed on to its seedlings which are of a higher quality, too! Was seedling 96-18-1.

[78-17-3N (Trumpet Call x Orange Way) x 82-108-4 (Zuni x Glenfarclas)]
Early Midseason \$ 25.00

CARROT TOP 2W-O (Dr. John Reed, USA)

This zany name was chosen by Gerard Knehans who was impressed with it in his Missouri garden. The long corona has a moderate orange color that intensifies as it ages hence the name. The petals overlap well but are a bit rough and the stems arch as it ages. Healthy and a good grower/seeder. Breeding 1W-Os. Smaller blooms will measure division one. Was Reed 80-129-1.

(Preamble x Johann Strauss) **Early Midseason** \$ 5.00

CASSOPOLIS 2Y-R (Dr. John Reed, USA)

Probably my best 2Y-R, this is a well-engineered daffodil with an exemplary smooth very flat wide perianth supported by a strong stem and neck. A row of blooms is almost military-like in their bearing. Alas, the deep colored cylinder-like cup burns easily and needs protection for show. It can flush the petals with red at times. Named for a local Michigan town where I have purchased my Ford trucks. Was Reed seedling 82-200-3.

[(Air Marshall x Caracas) x Creagh Dubh] **Early Midseason** \$ 6.00

CEDAR HILLS 3W-GYY (Mitsch & Havens, USA)

This sets the standard for beauty and quality in the late division threes. A show and garden flower of the highest caliber. Tall stems support the very large flowers with excellent poise, and color contrast.

(Impala x Green Hills) **Very Late Season** \$ 5.00

CELTIC PRINCE 1Y-Y (Dr. John Reed, USA)

This smaller 1Y-Y, possibly an intermediate has consistently given superb well-formed yellow flowers while being down for 8 years. It has freely open pollinated every year! Perhaps because the bees like it so well, too? This is from the reciprocal cross of Millennium Perfection. Stock is still small. Was Seedling 87-40-2.

(Dream Prince x Celtic Gold) Early Midseason \$11.00

CHANGING DAY 1Y-R (Dr. John Reed, USA)

An outstanding advance in yellow-red show quality trumpets. When it first flowered I knew it was a "Changing Day" in my breeding of red trumpets. Its perianth form is always superb and the colors are usually excellent. Bred from 2 seedlings chosen for color and form. See photo on DaffSeek. Few still to go. Was seedling 98-105-1.

**(Turk x 89-122-5 [Glenfarclas x 81-7-1 (Vulcan x Sutton Court)])
Early Midseason \$ 42.00**

CHARLIE CONNOR 1Y-O (John Pearson, ENG)

A very smooth show bloom. Its color has been variable here but great in the UK! Scarce. Fertile both ways.

(Glenfarclas x Uncle Duncan) Early Midseason \$ 4.00

CHICAGO GOLD 1Y-Y (Dr. John Reed, USA)

The original label states Ultra Smooth and Deep Gold. It has consistently done this since its first flowering here. Of the highest quality for exhibition, and also for the garden and breeding. The flowers are smaller than average. I find myself staring at it when I walk by it, even when the flowers are gone! Named in honor of the helpful members of the Chicago Daffodil Society. Stock is still small. Was Reed 93-1-2.

(Celtic Gold x Dream Prince) Early Season \$ 9.00

CHICAGO GOLD COAST 1Y-Y (Dr. John Reed, USA)

Named for the ritzy area of Lakeshore Drive in Chicago with very high priced apartments and homes. This flower is similar to Chicago Gold but slightly deeper in color and the petals are not as wide. Stock has increased enough to finally offer it. An excellent show flower of medium size. Was Reed 93-1-7.

(Celtic Gold x Dream Prince) Early Midseason \$ 14.00

CHICAGO HOPE 1Y-GYY (Dr. John Reed, USA)

The name says it all. Besides using the famous TV show's title, I had hoped that it would win the Rose Ribbon when shown some years ago in Chicago. But that honor went to a sibling of Haunting. It is a well-balanced, medium sized, smooth yellow trumpet capable of giving superb blooms. The smooth overlapping wide petals were inherited from Dream Prince and the vigor imparted from Golden Jewel. Proving to be a very good breeder, too. Was Reed 85-7-2

(Golden Jewel x Dream Prince) Early Midseason \$ 8.00

CHILOQUIN 1Y-W (Grant E. Mitsch, USA)

A vigorous show bloom that does well in the garden. Floriferous, smaller than average.

(Bethany or Limeade open-pollinated) Midseason \$ 4.00

CHIQUITA 2W-GPP (Murray Evans, USA)

WITHDRAWN THIS YEAR

CINCO DE MAYO 2W-GPP (Dr. John Reed, USA)

Late and large with a very smooth flat perianth. Almost a trumpet. Surprising to see so late in our bloom season. Well-liked by the late Joy Dyson in Australia. Healthy increaser for show and garden. Fertile. Was Reed Seedling 81-1-1

(Melody Lane x Dailmanach) Late Midseason \$ 8.00

CINNAMON RING 3W-WWO (Dr. John Reed, USA)

A more refined sibling of My Sweetheart with more subtle coloring. Tall strong stems support the smooth show flower well. Protect the flower's rim for show. Was Reed 81-197-8.

(Hampstead open-pollinated) Midseason \$ 7.00

CLOUDED YELLOW 2YYW-Y (John Pearson, ENG)

This amazing flower has won many best in show awards for its form and draws attention because of its unusual shadings. Nice. Very Scarce. Was John Pearson's Seedling 81-14-F1.

[(Camelot x Daydream) x Cool Shade] Midseason \$ 9.00

COCKATIEL 2W-WPW (Grant E. Mitsch, USA)

A most startling flower when first seen in Grant's flower garage. Nothing else like it, with its flat cup and unusual coloration. Can be shown. Scarce.

[Precedent x (Caro Nome x Carita)] **Midseason** **\$ 5.00**

COLOMA 1Y-P (Dr. John Reed, USA)

Dave Karnstedt made this cross for me while visiting in 1993 using my entire stock of Memento. I was stuck working in the emergency room that weekend. By using Memento as the seed parent, its stem stayed longer. This is the most consistent of all the clones saved. It has large flowers with tall stems, excellent poise, and smooth overlapping petals. The colors are medium in most season, but can be intense occasionally. It is taller and earlier here than American Dream. Named for the small Michigan town north of us where our tax accountant lives. Was seedling 93-9-4.

(Memento x Magician) **Early Midseason** **\$ 15.00**

COMMODORE PERRY 1W-GPP (Dr. John Reed, USA)

Such a perfect flower had to be near the highest level in the chain-of-command. An American hero with a great American daffodil named for him. While of smaller size it is almost perfect, with a flat smooth overlapping perianth and a light pink evenly expanded trumpet. One of the down under breeders, after seeing the photo (shown in our ADS ad) said that it must be the most perfect 1W-P in the world. Bred from a flower John Lea was using in his pink trumpet program, crossed with the best of Jackson's pinks at the time. A marriage made in daffodil heaven and a flower either breeder would be proud to claim. Thank you John and David! Was Reed 87-70-1.

(Lea 1-19-66 x Obsession) **Early Midseason** **\$ 15.00**

CONQUEST 2W-O (Spud Brogden, NZ)

An excellent, strong-growing variety for show, garden, and breeding. Scarce.

(Breeding unknown) **Midseason** **\$ 6.00**

COPPER MINE 2O-O (Dr. John Reed, USA)

When initially seen I was hard-pressed to code the petal color. Not a yellow but not a true red, either. The flower has become bigger, stronger and brighter as the stock as grown. Still scarce but very desirable for showing and breeding. Tall stems and large flowers guide your eyes to it! Very few to go. Was Reed 97-104-1.

(Cowboy x Burning Bush) **Midseason** **\$ 64.00**

COPPERFIELD 2Y-Y (R & E Havens, USA)

When well grown this is an unusual coloration. Buffy yellow petals support an orangish corona. The stem is strong with excellent poise. The petals have a good overlap and are smooth. For show and garden.

(Paricutin x Daydream) **Midseason** **\$ 5.00**

COWBOY 2Y-O (David Jackson, AUS)

A Large well colored bloom for show and garden. Excellent breeder, and vigorous!

(Craze x Coope) **Midseason** **\$ 5.00**

CREATION 1W-W (Grant E. Mitsch, USA)

This is the most vigorous non-rotting early show quality white trumpet here. The trumpet is flanged and the flower is fertile.

[(Trousseau x Paradise) x (Seedling A39/1 x Panache)] **Early Season** **\$ 5.00**

CROWN GOLD 2W-O (R & E Havens, USA)

Sun proof for garden, show and breeding. It has given me white-orange and white-yellow trumpets.

(Gold Crown x Paricutin) **Midseason** **\$ 4.00**

DAILMYSTIC 2W-P (B.S. Duncan, N. IRE)

Smooth show flower with a pale lavender cup color.

(Dailmanach x Cryptic) **Midseason** **\$ 6.00**

DAVE'S FAVORITE 2Y-O (Dr. John Reed, USA)

Dave Karnstedt was very fussy about the daffodils that he liked. They needed to point high and be aesthetically beautiful. In other words, approaching perfection! This late 2Y-O is one such flower that Dave seemed to really admire during one of his visits to Oakwood, hence the name. I wish it were more strongly colored; I have bred it with Burning Bush in hopes of achieving that end in the next generation. A very high-quality show flower. Was Reed 84-142-1.

(Safari x Bunclody) **Late Midseason** **\$ 5.00**

DAYTON LAKE 2W-Y (Dr. John Reed, USA)

From an early cross to improve Festivity, this selection was kept. Almost every bloom can go to show. The strong stem has a short neck with upward poise that displays a white perianth, which is very flat and smooth with no incurving. The pleasing mid-yellow cup does not stain the perianth. Fertile both ways. Can be unbelievably good. Was Reed 79-165-1.

(Festivity x Easter Moon) Midseason \$ 4.00

DENIS DAILY 2O-R (Dr. John Reed, USA)

Named for our Oakwood guest, a major figure in the Minnesota Daffodil Society until his untimely death in 2012. Bred to put a color-fastness gene into Sabine Hay. A large, round flower that needs protection for its best color, which is strong and distinct. Potential breeder. Was seedling number 87-9-1. NAME PENDING.

(Spelter x Sabine Hay) Midseason \$ 15.00

DIK DIK 2Y-R (Grant E. Mitsch, USA)

WITHDRAWN THIS YEAR

DINGUS DAY 2W-P(R) (Dr. John Reed, USA)

After the original cross made in 1988 flowered, it was repeated with even better results in 1994. This flower has better form and is more consistent in its intense cup color, ranging from deep pink to red-pink. A most imposing flower supported with tall stems here. It has been in bloom on Dingus Day (the Monday after Easter Sunday), a Polish holiday celebrated in South Bend, Indiana annually by politicians with beer, Polish sausage, and speeches. Was 94-14-1.

(Dear Me x Culmination) Early Midseason \$20.00

DOWNLANDS 3W-Y (Graham Phillips, NZ)

Good show flower. Clean stock. Very limited amount of bulbs available.

(Modulox x Flash Affair) Late Midseason \$ 8.00

DYNASTY 2Y-R (Spud Brogden, NZ)

One of Spud's best show flowers. Outstanding color and form.

[T42 (Air Marshall x Orator) x Loch Hope] Midseason \$ 7.00

EASY LOVER 2W-P (Dr. John Reed, USA)

WITHDRAWN THIS YEAR

EDIE 2W-P (Dr. John Reed, USA)

Named for our wonderful daffodil helper, Edie Godfrey. She has been there to help, especially with sending out orders. Edie actually was at my bedside to help when I had a pulmonary embolism. This is my first very pure pink cup named from Lavender Hope. The stems are long, supporting pure pink cups against white overlapping petals. It is showable and fertile. This is the flower you want if you desire REAL, in this climate, PINK COLOR. Stock is still small. Was Reed 97-76-1.

(Lawless x Lavender Hope) Midseason \$ 38.00

ENERGIZER 2O-R (Dr. John Reed, USA)

Early in my breeding I was determined to improve the all-orange-red daffodils by breeding and selecting for more color intensity and color "fastness" as they flower here. My early seedlings and those of Brian Duncan's from Altruist would only show a deep perianth color in the best of seasons and none ever showed the intensity that Gypsy or Fiery Flame did in Oregon. Only two selections were kept from this intensely "hot" cross and this one has demonstrated the best combination of form and color resistance here. Hopefully its name says it all. Like the little pink bunny with its beating drums it will energize your spring garden, show table and breeding program. Increase has been slow. Was Reed Seedling 87-6-2.

(Sabine Hay x Stylish) Early Midseason \$ 19.00

EVESHAM 3W-GYY (John Lea, ENG)

WITHDRAWN THIS YEAR

EXCALIBUR 2Y-O (John Hunter, NZ)

WITHDRAWN THIS YEAR

FIRST STEP 6W-O (Dr. John Reed, USA)

My first 6W-O. Short cupped and color variable but good in recent years. Was seedling 81-23-1.

(Kilworth x Ballydorn 6W-Y seedling) Late Season \$ 8.00

FLAMING JEWEL 3W-R (David Bell, NZ)

Very consistent with lovely blooms. Healthy. One of David's best grown here. Very limited stock.

(Masquerade x Arbar) Late Midseason \$ 9.00

FLAMING SILK 1W-R (Dr. John Reed, USA)

It seemed logical to cross Pink Silk and Magician to get a 1W-R. This is the only one in two cross attempts that measured division 1. The cross was made both ways, too. Magician gave the best flowers as a seed parent. Its color is not the ultimate red, but it is a very good starting point. Strong, tall stems support large flowers of show quality with an excellent poise. The bulbs are healthy and it is fertile both ways. Was seedling 94-8-1.

(Magician x Pink Silk) Midseason \$ 48.00

FLINTLOCK 2W-Y (David Jackson, AUS)

Jackson's best bicolor here. Variable. Capable of Best in Show. Limited Stock.

(Seedling x Seedling) Midseason \$ 12.00

FLUSHER 2O-R (Dr. John Reed, USA)

From my first cross to get an orange-petaled orange trumpet. Two of 120 flowers showed some color in the petals. Alas, the slowest growing one was the best colored one! Of trumpet character and form, it usually has some degree of petal flush. The stems are tall but not as strong as I would like. The corona measures 30 mm and petals 36 mm (Note: most of my daffodils will grow bigger in a protected watered area. All the flowers measured here are grown in the fields). The petals have good overlap and excellent poise. I did not breed with it until I actually flowered a 1O-O. Was Reed 84-79-2.

(Glenfarclas x Creag Dubh) Early Midseason \$11.00

FORT MITCHELL 1W-Y (Dr. John Reed, USA)

Named in honor of the site of the 2002 ADS National Show where it beat many well-known flowers in its single bloom class. Its perfection and smoothness cried out for being exhibited so it was removed from our trade stand to win the single bloom award. It was cut from the open windswept field of 10 acres. It was beautiful with its chaste smooth flat perianth and its mid-yellow trumpet. Every bloom was identical. Very consistent! Was Reed 81-107-1.

(Cool Contrast x ? --possibly Flash Affair) Early Midseason \$ 5.00

FRANZ JACKSON 2W-O (Dr. John Reed, USA)

Sibling to Tangerine Delight. It is slightly earlier and a couple millimeters short of a trumpet measurement. Excellent carriage and reasonable form. Named for a jazz musician, the father of one of Sandy's friends. Very small stock. Only 3 to go. Was Reed 98-32-1.

(Orange Tint x Lutana) Early Midseason \$ 50.00

GALIEN 2W-Y (Dr. John Reed, USA)

When this cross flowered I was hard pressed to decide which ones to keep. This is the only one of about 200 seedlings that was retained. Its perianth is very smooth with perfectly flat petals in the same plane. The tall flowers support a deep-yellow cup with strong stems and excellent poise, but petals are not wide. Much admired by Mike Berrigan. Growth was slow initially but seems to be improving now. Just cut for show or admire it in the garden. Named for the small local Michigan town near Dayton Lake. Was Reed 79-21-1.

(Easter Moon x Chapeau) Midseason \$ 9.00

GARBO 11AY-P (Dr. John Reed, USA)

The second of my yellow-pink split coronas "painted ladies" to be named. Similar to Bacall but smoother with better color. For show and garden. Very attractive. Was Reed 87-63-6.

(Dear Love x Kabonova) Midseason \$ 10.00

GARDEN GATE 3W-YYP (Dr. John Reed, USA)

Excellent, smooth show flower. Yellow fades with time. Was Seedling 86-62-1.

(Fragrant Rose x Kerstin) Midseason \$ 9.00

GEOMETRICS 2W-Y (Sid DuBose, USA)

A beautifully formed show flower. Perhaps Sid's best. Before passing away Sid stated that it had given his best ever 2W-W! Scarce.

(Precedent x Camelot) Midseason \$ 7.00

GEORGE GERSHWIN 2W-O (Dr. John Reed, USA)

In my quest for a 1W-O, this cross was made. One selection actually was a division one but it was terribly weak and discarded. This flower has the best traits and actually did produce a well-formed 1W-O in its offspring. While the perianth is of average quality, the stem, neck, poise, and color are very good. The cup is about 30 mm long and the perianth 35 mm. In the tradition of its pollen parent, a composer's name was chose. This time an American. Formerly Reed 80-129-5.

(Preamble x Johann Strauss) Midseason \$ 4.00

GOLD CONVENTION 2Y-Y (John Lea, ENG)

An imposing larger show flower. Still good for show, breeding, and garden.

(Seedling x Seedling) Midseason \$ 4.00

GOLDEN BIRTHDAY 2Y-Y (Dr. John Reed, USA)

A lovely, well balanced smooth yellow medium-sized trumpet of the highest show quality. Wide overlapping petals greet the eyes and help to focus on the rest of its outstanding features. Named in honor of the American Daffodil Society's fiftieth anniversary in 2004. See DaffSeek photo. Was Reed 85-7-7.

(Golden Jewel x Dream Prince) Midseason \$ 10.00

GOLDEN RICHES 1Y-Y (David Bell, NZ)

Almost a self-orange in favorable seasons. For garden and breeding but can be shown. Nicely ruffled flange on the trumpet. Vigorous and dependable.

[(Red Conquest x Golden Fortune) x Salome] Early Season 3 for \$ 10.00

GREAT JOY 2W-P Dr. John Reed, USA (Name pending registration)

This flower resulted from my first efforts to breed a 1W-R. Even though it is not a full trumpet, nor red, the plant is vigorous and smooth with tall stems. Cup color can almost be red in some seasons. Very good. Named for Joy Haeffner, who has been a great help and a joy for Oakwood. Was Reed 96-3-1. Shown in Kirby Fong's winning collection in 2013. See DaffSeek for a well-colored picture.

(Pink Silk x Magician) Early Midseason \$ 22.00

GREEN ENVY 3W-GWW (Dr. John Reed, USA)

Combining the better qualities of its parents, we have a tall, well-formed late white that consistently has a deep, green eye to the small spreading slightly frilled cup. A strong plant that multiplies very well and is later than the much smaller Jade. The really deep, mossy green center when seen can make one green with envy. Was Reed 91-73-2.

(Limey Circle x Dunley Hall) Very Late Season \$ 8.00

GREEN HOPE 2W-GWW (Dr. John Reed, USA)

A beautiful green-eyed flower that has given me the best of my green-eyed daffodils. Was Reed Seedling 85-26-4. Offered as Green Heart last year, now registered as Green Hope.

(Angel x Misty Glen) Late Midseason \$ 18.00

GREEN SPICE 3W-G (Dr. John Reed, USA)

WITHDRAWN THIS YEAR

GULL 2W-GWW (Grant E. Mitsch, USA)

WITHDRAWN THIS YEAR

GUY WILSON 2W-W (John Pearson, ENG)

This is the best formed 2W-W of John's breeding. A beautiful show flower of the highest caliber. Scarce.

(Stoke Charity x Panache) Midseason \$ 15.00

HALOGEN 2Y-W (Dr. John Reed, USA)

WITHDRAWN THIS YEAR

HANBURY 2W-W (Clive Postles, ENG)

At its best this is the most beautiful 2W-W I grow. Of trumpet character, it is healthy and fertile with tall strong stems and excellent poise.

(Ben Avon x Panache) Midseason \$ 6.00

HANKY PANKY 11aY-Y (Dr. John Reed, USA)

Named for a rock 'n roll song by Tommy James, originally from Niles, Michigan. A great improvement over King Size. Has won its class in the National Show. Good breeder. Was seedling 90-29-1

(King Size x Dream Prince) Midseason \$ 8.00

HAROLD'S CROSS 3W-P (Dr. John Reed, USA)

This sets my standard for size, roundness, and stem height in division 3W-Ps. Named to honor Harold Cross of Tasmania, Australia who pioneered much of the initial breeding efforts in 3W-Ps. His Possum 3W-P is the reciprocal breeding of my American Possum, the pollen parent of this 3W-P. Vigorous but slower growing. Excellent overlapping petals, poise with light pink cup color. Was Reed 95-125-1.

(Strawberry Shortcake x American Possum) Midseason \$ 30.00

HAUNTING 3Y-Y (Dr. John Reed, USA)

The name says it all! I marked Haunting on the plastic label I staked it with when I first saw it in bloom that warm breezy late spring day. It appeared hauntingly beautiful then and it continues to be the best 3Y-Y that I have grown for show. Pictured in the March 2003 ADS advertisement for Oakwood Daffodils. Perfect balance, form, stem, neck, poise and petals. Almost a perfect uniform shade of yellow. Was Reed 84-41-2.

(Emily x Minster Lodge) Late Season \$ 8.00

HAWLEY GIFT 2Y-R (J. M. Radcliff, AUS / Registered by Dr. John Reed, USA)

Sent here under seedling number from the Radcliff's, this is a very special high quality addition to Oakwood. Highly admired by many ADS members here, it is now demonstrating its value as a breeder and a show flower. It looks like a red trumpet. The blooms are well colored and have a well overlapping, very smooth perianth. Poise and stems are excellent. Was Radcliff 9/84.

(Breeding unknown) Midseason \$ 9.00

HEAVEN'S GATE 2W-P (Dr. John Reed, USA) WITHDRAWN THIS YEAR**HELEN'S MEMORY 3W-Y (Dr. John Reed, USA)**

A beautiful flower with intense colors. It is hard to believe this came from Grace Note! Smooth flat, overlapping perianth segments display the brilliant yellow crinkled cup. Blooms can be quite large and all have strong stems with good necks. Was Reed 90-69-11.

(Grace Note x Dunley Hall) Late Season \$ 16.00

HOLME FEN 2W-Y (John Pearson, ENG) WITHDRAWN THIS YEAR**HOLY COW! 2W-O (Dr. John Reed, USA)**

This flower's cup is hard to believe with its pleats and crinkles. Colors are more orange than yellow in most years. The perianth is well formed with excellent poise and strong straight stems. As it was bred from Great Scott, this exclamation of the Chicago Cubs sports announcer, Harry Cary, seemed an appropriate name. Photo is in DaffSeek. A unique flower for garden and breeding. Was Reed 95-220-4.

(Great Scott x Arwon) Midseason \$ 20.00

ICED TEA 2W-P (Dr. John Reed, USA)

A rare color break, I consider this the first of my honey-brown cups from pink breeding. Tall vigorous with smooth blooms of great show quality. Late. Nothing else like it yet. Fertile both ways. Slower growing. Was Reed seedling 95-19-1.

(Valinor x Verran Rose) Late Midseason \$ 50.00

IRISH AFFAIR 2W-Y (Dr. John Reed, USA)

This is by far the best 2W-Y I have raised and **named and released** so far. After opening the petals and cup expand and take on a more notable appearance. Heavy substance, bright crisp colors, large size with an excellent stem and neck characterize this flower. Fertile, but seed shy. Named for the romance between my stepdaughter, Michele and her boyfriend, John, when she spent a year in Belfast going to the University of Ulster. (Irish Wedding celebrated their marriage in Northern Ireland). Also, a combining of the names of both daffodils. This is a great flower that needs to be seen to be appreciated. Great in the garden and shows, too. Was Reed 84-34-1.

(Irish Mist x Flash Affair) Midseason \$ 6.00

IRISH MINT 3W-GGW (Dr. John Reed, USA)

A smaller show flower of great smoothness and roundness. Fertile and transmitting that smoothness to its offspring. The amount of green in the eye will be less in dry seasons. Was seedling 85-99-1.

(Angel x Achnasheen) Midseason \$ 8.00

IROUOIS 2YYW-O Richard & Elise Havens, USA)

A very unique show flower. Beautiful.

[(Paricutin x Daydream) x (Red Marley x Brer Fox)]

Midseason \$ 5.00

IVORY GOLD 1W-O (gold-toned) (Dr. John Reed, USA)

The cross that gave Kamms and Aunt Betty also gave this beauty with a golden-orange tinted trumpet against an ivory colored perianth. It reminded me of the photo of a similar Backhouse seedling that Eric Longford had sent me years before. I kept this to cross for better formed 1W-Os. Using my first generation seedling crosses for 1W-Os, that were 2W-Os, it has proved itself. Freddie Silcock suggested that these ivory petaled flowers were a backdoor or a short cut to 1W-Os. He was right! Was Reed Seedling 78-19-8.

(Trumpet Call x Lea 1-6-60) Early Midseason \$ 8.00

IVORY ORANGE 1W-O (Dr. John Reed, USA)

This came from a cross that gave me more intensely colored 1Y-Rs. This ivory petaled selection has a trumpet that is more deeply colored than Ivory Gold. Sent out for trials around the Midwest, it has given reports of better corona color intensity than demonstrated here. Not only excellent in the garden, it is producing show quality 1W-Os with solid orange coronas. Was Reed Seedling 87-19-8.

(Trumpet Call x Glenfarclas) Midseason \$ 8.00

JACK WOOD 11aY-YYO (Ron Scamp, ENG)

Good size, poise and stem with a pale-orangish split corona. For show and garden.

(Saint Keverne x Tiritomba) Midseason \$ 6.00

JAMORE 2Y-R (Jim O'More, NZ)

One of the most consistent show flowers in its class with "very" smooth overlapping petals. It can be well colored and of Best in Show caliber. See DaffSeek. Very Scarce. Only source in the Northern Hemisphere is Oakwood.

(Air Marshall x Falstaff) Midseason \$ 8.00

JOHN EMMETT 2Y-O (Clive Postles, ENG)

This sibling to Cutting Edge has never been listed to my knowledge. It is bigger, more vigorous and a far superior flower. alas, just short of a trumpet. See photos on Daffseek.org. It has suffered with some rot here but far less than its parent and sibling. Recommend for the highest level of showing and breeding. Only a few to go. Was Postles Seedling 1-27-89.

(Lea 1-14-76 x Hampton Court) Midseason \$ 58.00

JOHNNY DODDS 1Y-O (John Pearson, ENG)

Similar to Charlie Conner but smaller and more color to it. Show flower and breeder. Named for a jazz clarinetist. Our first offering of this scarce flower.

(Glenfarclas x Uncle Duncan) Midseason \$ 8.00

JUMP-UP 1Y-O (M. G. Temple-Smith, AUS)

WITHDRAWN THIS YEAR

KAREKA 2W-Y (Spud Brogden, NZ)

An excellent show flower, with strong stems and wide overlapping petals. Scarce.

(Artist's Dream x Egmont Pride) Late Midseason \$ 4.00

KEN'S FAVORITE 2W-P (Murray Evans, USA)

WITHDRAWN THIS YEAR

KILLEARNAN 3W-GYR (Navarro/Lea, ENG)

This was introduced as a poet and then changed to division 3. A perfect show flower with many Best in Show awards.

(Andrew Marvel x Greenfinch) Late Midseason \$ 4.00

KIMMERIDGE 3W-YYO (D & J Blanchard, ENG)

Many times a winning show flower, including Best in Show. Needs shading for better color.

(Port Rush x Pretty Polly) Midseason \$ 3.00

KIWI AFFAIR 2W-Y (Dr. John Reed, USA)

WITHDRAWN THIS YEAR

LADY DIANA 2W-W (Broadfield Daffodils, AUS)

An Early Outstanding top shelf show flower. Easily capable of being a best in show bloom. Don's Best! Excellent breeder.

(Lady Slim x Gwyn) Early Midseason \$ 6.00

LADY KILPA 2W-Y (Broadfield Daffodils, AUS)

Large strong growing show flower. Scarce.

(Kilpa x Lady Slim) Midseason \$ 7.00

La PALOMA 3W-GYR (William Rouse, USA)

Simply the most sought after American small cup show daffodil. Perfect in all respects with many Best in Show awards. Very circular form with smooth overlapping petals. I have enough to finally list it again.

(Estrella x Merlin) Late Midseason \$ 10.00

LAWLESS 2W-P (D. Jackson, AUS)

A very light almost lavender-pink. An excellent show flower.
(Accent x Verran)

Early Midseason \$ 4.00

LEMON DESIRE 1Y-W (Dr. John Reed, USA) WITHDRAWN THIS YEAR**LEMON DREAM 1Y-Y (Dr. John Reed, USA) Name pending registration.**

A beautifully smooth show bloom. Medium sized. Healthy. Increase slower than the average, overlapping petals with lovely form. Its color is a "Lemon Dream". 1993 cross.

(Dream Prince x ?) **Early Midseason \$ 30.00**

LEMON LYRIC 2YYW-Y (Grant E. Mitsch USA)

This flower was retained for breeding but is an excellent show flower too. Parent of American Classic and Magic Lantern. Has excellent stems, poise for garden and show. The corona is trumpet shaped and more of a buffy yellow color.

(Top Notch x Camelot) **Midseason \$ 5.00**

LIKE IT 3W-YYR (Dr. John Reed, USA)

This is the second cultivar to be named from this cross. All are distinctive, strong growers and show flowers. More intense color than Macilynn and wider petals. The name was given by Mike Berrigan on observing it. Was Reed Seedling 95-34-3. NAME PENDING.

(La Paloma x My Sweetheart) **Midseason \$25.00**

LIKELY LAD 1Y-Y (M. J. Brown, ENG)

Similar to its parent *N. asteriensis* but larger. Very slow grower here with the original bulb from MJB obtained over 30 years ago. An ADS miniature.

(*N. asteriensis* x ?) **Early, Early Season \$ 8.00**

LIMEY CIRCLE 3W-WWY (Eve Robinson, USA)

A beautiful show flower. Vigorous. In some seasons it may have a limey green color to its rim.

(Carnmoon x Green Island) **Late Season \$ 4.00**

LITTLE CUDA 6Y-Y (Dr. John Reed, USA)

This is the last of the Heidi o.p. seedlings that I have selected. It is very easy to recognize because of its very long corona with dentate-like edges that remind me of teeth like a barracuda. Showable, healthy and fertile. A true miniature. Stock is small. Was seedling Heidi o.p #3

(Heidi open-pollinated) **Early Season \$ 16.00**

LITTLE SHEBA 6Y-Y (Dr. John Reed, USA)

An obvious miniature, it is slightly smaller than its sibling Heidi's Sister. The medium length corona is displayed on a symmetrically swept back perianth with narrow segments. Very dainty with short strong stems and a good doer in our sandy loam. Was Seedling Heidi o.p. #2.

(Heidi open-pollinated) **Early Season \$16.00**

LIVING COLOUR 2W-GRR (Colin Crotty, NZ)

Deeply colored but has short stems. Has proved itself as a valuable breeder here.

[(Rainbow x Cherry Rim) x Eclat] **Midseason \$ 4.00**

INDIANA UNIVERSITY 2W-R (Dr. John Reed, USA) WITHDRAWN THIS YEAR**LONESOME DOVE 2W-W (William G Pannill, USA) WITHDRAWN THIS YEAR****LOUISE RANDALL 2W-W (Dr. John Reed, USA)**

This is a beautiful daffodil named for a very special lady who loved daffodils. For many years Louise and her son, Bob, would help me plant daffodils especially when I got behind. She even helped in the snowy November weather when she was in her 80s. This is the **most consistent early midseason white for show** that I have named so far. It is also great in the garden. By combining the best attributes of its parents, it never lets you down. Neither did Louise! Was Reed 89-9-1.

(Misty Glen x Rhapsody) **Early Midseason \$ 7.00**

LUBAANTUN 1YYW-WWY (John Pearson, ENG)

In my opinion this is the most dramatically colored reverse trumpet from John. The stem is strong, tall and holds the flower with an excellent poise. The petals are broad, overlapping and at the right development time a nice roll is seen to the trumpet with a bright yellow rim. Very scarce.

[(Camelot x Daydream) x Gin & Lime] **Midseason** **\$ 10.00**

LUNAR SEA 1Y-W (Grant E. Mitsch, USA)

Part of Grants original cross that started his domination of the reverse bicolor's (Y-W). Very vigorous and free flowering from bulbs down 24 years. Stays healthy if not dug. A show flower with strong tall stems. Breeder.

(King of the North x Content) **Midseason** **\$ 8.00**

LYDICK 2W-R (Dr. John Reed, USA)

Offered for breeding and garden use. The original stock clumped up very fast and bulbs were dug six years ago to fatten them up again. It has been a good breeder for deep pink/red flowers. A great improvement over Spaceship. Very healthy, excellent stem, neck and wide petals. Named for a small local Indiana town.

(Spaceship x Culmination) **Early Midseason** **\$ 5.00**

MACDALLA 1W-Y (David Jackson, AUS)

A very smooth show winner from Tasmania. Its corona is more tubular and a pale yellow in color as it has grown here. It was a deeper color when seen down under. First time offered by me and stock is still small. An excellent show flower and good grower. See Daffseek photo.

(Breeding unknown) **Early Season** **\$ 18.00**

MACILYNN 3W-YYR (Dr. John Reed, USA)

It seemed logical to cross the vigorous and colorful My Sweetheart with LaPaloma. This is possibly the best all-around show flower of the seven selections kept. It is named for Oakwood's own sweetheart Chrissy Wagoner's little baby. This is a vigorous grower and increaser! Was Reed 95-34-2.

(La Paloma x My Sweetheart) **Midseason** **\$ 24.00**

MAGICIAN 2W-R (Grant E. Mitsch, USA)

This was hard to believe when first seen! An eye opener. A true shade of brilliant orange-red to the slightly oversized cup. Stems are strong and short. A significant breeder and a great flower in the garden. Has a tendency to rot in storage, therefore, it is better to replant it immediately..

[(Accent x Rose Caprice) x Cool Flame] **Midseason** **\$ 7.00**

MAGIC CHARM 2W-R (Mitsch and Havens, USA)

An impressive well colored flower in this climate. The corona is a deep red set against a pure white well formed perianth. Corona is slightly longer than Catalyst. Excellent stem and neck. Seed sterile here.

(Decoy x Magician) **Midseason** **\$ 12.00**

MAGIC LANTERN 1Y-O (Richard and Elise Havens, USA)

A most unusual flower that passes through several color changes as it matures. Has been a very popular high quality show bloom. See daffseek photos. Very smooth over lapping perianth segments can be whitish at times. The corona is tubular with a slight expansion. Color varies for a yellow to a cheesy orange.

(Lemon Lyric x Lemon Sails) **Midseason** **\$ 13.00**

MAGIC STEP 2W-P (Richard and Elise Havens, USA)

Tall stems display single blooms of nicely formed pink cups resembling its jonquilla heritage.

(Quick Step x Magician) **Late Midseason** **\$ 9.00**

MAX 11aY-YRR (Ron Scamp, ENG)

A distinctive show quality split corona supported on strong stems. The coloration can be variable here. Very healthy.

(Gironde x Falstaff) **Midseason** **\$ 5.00**

MEMORIAL DAY 2W-P (Dr. John Reed, USA)

Named in honor of the Memorial Day daffodil dig that has become a tradition here, sharing our excess bulbs with the daffodil clubs who come to help us dig the fields. A late, smooth, large pink with excellent vigor increase and show quality. Blooms held on strong stems. Was Reed 90-75-3. Click on Daffseek.org to see the intensely violet-shaded cup.

(Everpink x Kerstin) **Late Midseason** **\$ 15.00**

MEMORIAL GOLD 1Y-Y (Dr. John Reed, USA)

From a cross of intense quality comes a flower that can be shown without any grooming. Named for the hospital I was born in and work for now. A deep yellow shade with excellent poise, stem and neck, overlapping smoothness, etc.!

Was Reed 91-54-1.

(Gold Convention x Goldfinger) **Early Midseason** **\$ 15.00**

MIGHTY MITE 1YYG-Y (Dr. John Reed, USA)

Many hundreds of seedlings were raised from this cross giving standard sized blooms and smaller intermediate ones. This has been the best show intermediate yellow trumpet I have raised, albeit increase has been slow. The plants have been healthy and fertile both ways. See the photo on DaffSeek. Very limited stock, few to go. Was Reed 2010 selection #5.

(Celtic Gold x Dream Prince) **Early Midseason** **\$ 45.00**

MILLENNIUM ORANGE 1W-O (Dr. John Reed, USA)

This is the finest white-orange trumpet that I have named to date. The corona shades from deep to light orange down the corona. The stem, neck, poise and petal overlap are outstanding. Much admired by Peter Ramsay when he visited here. Very fertile. Photo is in DaffSeek. Only 3 offered for the most ardent narcissophile, as stock is still scarce. Was Seedling 96-125-2.

[81-125-2 (Preamble x Poets Dream) x Lutana] **Early Midseason** **\$ 80.00**

MILLENNIUM PERFECTION 1Y-Y (Dr. John Reed, USA)

Of all the yellow trumpets that I have flowered, this has consistently been the finest show flower from year to year as it grows in the field. The cross for it was made 5 times and this was from the last attempt. A bulb given to Bob Spotts took Best in Show at the 2010 National ADS Show. The petals are very smooth and their width is extraordinary. It is giving these characteristics to its offspring. Its picture can be seen on DaffSeek. Was Reed seedling 95-1-1.

(Celtic Gold x Dream Prince) **Midseason** **\$ 50.00**

MILLENNIUM RED 2W-R (Dr. John Reed, USA)

When it first flowered this was the most pure red cup I had developed. Not a dark red like Catalyst but a pure vibrant red. It in turn is breeding this color. It has excellent petals that are very white with good overlap. Strong stems with up facing poise display the blooms well. Was Reed seedling 91-6-1. Scarce.

(Evans W 2/5 x Ruby Red) **Midseason** **\$ 30.00**

MODULUX 2W-Y (P & G Phillips, NZ)

The most vigorous free blooming show daffodil I grow. A clump has bloomed here for over 20 years and was loaded with blooms.

(Breeding unknown) **Midseason** **\$ 4.00**

MOON BURST 4Y-W (Dr. John Reed, USA)

A lovely colored reverse double. It takes several days for the white to color up well. Strong stems. Can be shown. Was Reed Seedling 82-121-1.

(Spun Honey x Bethany) **Late Midseason** **\$ 8.00**

MY COLLEEN 2W-P (Dr. John Reed, USA)

Named for my wife Sandy, using her middle name. It is tall, vigorous and well colored in this climate. Stands out at a distance. The flowers are on strong stems, very smooth and of trumpet character. Very fertile and healthy. Was Reed Seedling 98-101-1.

[89-28-4 (Dear Me x Pink Wax) x 84-137-10 (Dear Me x Magician)]
Early Midseason **\$ 30.00**

NEON LIGHT 2W-YOO (Clive Postles, ENG)

A scarce show flower. Beautiful. See DaffSeek.org photo.

(Rubh Mor x Loch Brora) **Late Season** **\$ 4.00**

NEW KID 3W-YJR (Dr. John Reed, USA)

The third selection from this very good cross to be named. Again the name given by Mike Berrigan who seems to really like these siblings. Distinctive from the others but well colored and strong grower. Was Reed Seedling 95-34-4.

(La Paloma x My Sweetheart) **Midseason** **\$ 30.00**

NEW PARIS 2W-P (Dr. John Reed, USA)

Very white and very pink with a show quality perianth inherited from Obsession. It has a ruffled corona that does not catch the petals that incurve slightly. For show and breeding, healthy. Named for a local town in Indiana. See photo on DaffSeek. Has not been offered for some time. Was 85-34-2.

(Kens Favorite x Obsession) **Midseason** **\$ 7.00**

NEW PENNY 3Y-Y (William G Pannill, USA)

Perhaps the most popular show bloom in its class in the USA. Vigorous

(Lemonade x Lemnos) **Midseason** **\$ 4.00**

NOTEWORTHY 3W-YYO (William Pannill, USA)

Tall, vigorous for show and garden. Scarce. Very good. Impressive looking with larger blooms.

(Lough Areema x Rose Caprice) x Jewel Song **Late Season** **\$ 5.00**

NOTRE DAME 2W-GYP (B.S. Duncan, N. IRE)

Many awards for this excellent show flower with very tall stems and very smooth perianth segments. Corona is tubular.

(Raspberry Ring x Fragrant Rose) **Late Season** **\$ 5.00**

NOWRA 2W-R (David Jackson, TAS, AU)

One of David's best in its class. The color has been variable here.

(Potent x Hartz) **Midseason** **\$ 6.00**

NYNJA 2Y-Y (David Jackson, AUS)

A smooth, all yeallow show flower with many awards. A good breeder, also.

(Scipio x 11/78) **Midseason** **\$ 5.00**

OAKWOOD STIMULUS (formerly STIMULUS) 2YO-R (Dr. John Reed, USA)

Just short of a trumpet and intensely colored. The perianth can flush orangish-red in a favorable season. Not of the highest show caliber, but it stands out (shouts at you!) in the garden due to its coloration. Offered for breeding and garden use. As President Obama has offered us a stimulus to get our economy going, I offer you a stimulus for further breeding toward the ultimate 10-R! Was Reed 89-122-2.

[Glenfarclas x 81-7-1 (Vulcan x Sutton Court)] **Early Midseason** **\$ 6.00**

OREGON TRAIL 1Y-R (William F. Tribe, USA)

A well colored but smaller red trumpet for show and garden. Scarce. I have a very good strong-growing stock. Multiplies well.

(((Arctic Gold x Brer Fox) x open-pollinated] x Javelin) **Early Season** **\$ 9.00**

PEACEFUL HOLLOW 6Y-O (Dr. John Reed, USA) Name pending registration

A sibling to Wayne's World. It has drawn praise from several ADS judges. Smooth and well-formed but slightly larger than Wayne's World. Also slow growing! Well swept-back petals sport an orange, medium length corona. Stock is small. Was Reed 84-49-2.

(Monal x N. cyclamineus) **Early Season** **\$ 16.00**

PEGGY MACNEALE 2W-W (Dr. John Reed, USA)

Peggy was an outstanding and long-time member of the ADS that she loved. Her enthusiasm brought many new daffodil lovers to join the ADS and the SWODS group. Her trips to Oakwood were only at bulb digging time because of her ADS duties. She liked to point out particular bird calls to us novices while she hiked the wooded hills of Oakwood. Oakwood loved Peggy. This is a superb smooth show flower. Very white bloom with trumpet shaped corona on strong stems with excellent poise. Was 84-122-3.

(Inverpolly x Kindee) **Midseason** **\$ 14.00**

PIERCE-ARROW 1Y-O (Dr. John Reed, USA)

Show quality 1Y-Os are still scarce, especially those that flower late. This vigorous daffodil blooms in late midseason here. It is of excellent size and height. And is of show quality with good poise, overlapping petals and non-fading color. Named for the classic American cars made in Albany, New York. A twelve-cylinder version of the Pierce Arrow set a world land speed record in the early 1930s driven on the Bonneville Salt Flats. Was Reed Seedling 89-83-17.

(Trumpet Call x Glenfarclas) **Late Midseason** **\$ 5.00**

PICTURE PERFECT 2Y-R (Dr. John Reed, USA)

Large imposing flowers are held high on strong stems. Excellent color. Needs to be wind protected and watered for the best blooms.

(Safari x Bunclody) **Late Season** **\$ 6.00**

PIKE LAKE 2W-Y (Dr. John Reed, USA)

The newest of the Lake Series to be named. Admired by several ADS judges and myself. Its strong stem, neck, poise and the late midseason flowering make this flat perianth beauty a good show flower. It was the only W-Y in a cross that gave many lovely W-Ws. Named for a small fishing lake just east of Dayton Lake. This is very vigorous and giving nice seedlings. Was Reed 88-82-1.

(Misty Glen x Immaculate) **Late Midseason** **\$ 6.00**

PINHOOK LAGOON 1W-Y (Dr. John Reed, USA)

A fine show quality trumpet, named for the local lake where I caught my first fish as a child. Was 97-31-3. See DaffSeek photo.

(Dayton Lake x Irish Affair) **Early Midseason** **\$ 12.00**

PINK CLIMAX 2Y-P (Dr. John Reed, USA)

This was the name that came to me when I first saw it in bloom. The flower colors are pastel and very pure. Almost a lavender pink in the trumpet shaped corona. Definitely not garish. I can only hope that David Bell has been looking down from Daffodil Heaven to see it in bloom. Vigorous and floriferous. Was Reed Seedling 92-169-1. See DaffSeek photo.

(Quantasia x Fidelity) **Midseason** **\$ 10.00**

PINK FLUSH 2P-P (Dr. John Reed, USA)

Simply the most consistent show quality pink flushed perianth I have raised or seen here. Every year it has shown a warm pink glow in its smooth flat, overlapping perianth. It is also giving that color and quality to its offspring. Was Reed 90-100-2.

(Music x Culmination) **Late Midseason** **\$ 12.00**

PINK SUN 2Y-P (Charles Wheatley, USA)

Rarely seen, I now have enough of this distinctive show flower to offer it. The best yellow-pink from Charles. It has excellent petals, smooth, overlapping and almost touching showing off a deep pink trumpet shaped, large cup. Stems are strong and poise is excellent. Colors vary with the prevailing weather, especially with moisture. An excellent breeder for me. Was Wheatly 87-150-2.

(Troupial x Dailmanich ?) **Midseason** **\$ 16.00**

PINK TOPAZ 1W-P (John Hunter, NZ)

The best show 1W-P from NZ. Does better in its mild climate in NZ than in Michigan; it needs water and wind protection to do well here. Strong stems support very large flowers.

[(Karanja x seedling) x Value] **Midseason** **\$ 15.00**

PIN-UP GIRL (formerly COVER GIRL) 2W-P (Dr. John Reed, USA)

A combination of a superb show quality perianth with well overlapping smooth segments. The corona is a lovely shade of pink.. Very consistent and vigorous grower here. Was Reed Seedling 90-75-1.

(Everpink x Kerstin) **Midseason** **\$ 5.00**

POCKET CHANGE 1Y-Y (Dr. John Reed, USA)

I have been reluctant to offer this because it has grown much larger from when it was selected. A better name might be Big Bucks. Tall, strong and smooth. Offered at a lower price to encourage trying it. Was Reed Seedling 90-35-1.

(Celtic Gold x Dream Prince) **Midseason** **\$ 10.00**

POLAR GLOW 2W-PPW (John Hunter, NZ)

WITHDRAWN THIS YEAR

POLAR SKY 2W-WWP (John Hunter, NZ)

A vigorous show bloom. Rarely offered. Needs water and wind protections for best blooms here. DaffSeek.
(Leonaine x seedling) Midseason \$ 10.00

QUANTUM LEAP 10-R (Dr. John Reed, USA)

When this first flowered I was amazed to see its Altruist-like coppery petals. While I have never seen that copper color again the petals do show a reasonable light orange flushing and the big trumpet has intensified in color. Jason Delany has insisted that I should code it as red, not orange. This change has been made. It has tall stems that show some arching. It is fertile both ways and has been retained for breeding. It has given orange trumpet seedlings with Flusher. Was Seedling 94-15-2.
(American Revolution x Corbiere) Early Midseason \$15.00

QUEEN'S GUARD 1W-Y (B.S. Duncan, N. IRE)**WITHDRAWN THIS YEAR****QUIET WATERS 1W-W (John Pearson, ENG)**

One of a few outstanding white trumpets for show. It has a very round form with overlapping perianth segments held on strong stems with excellent poise. Healthy here.
(Stoke Charity x Panache) Late Midseason \$ 10.00

QUICKFIRE 2Y-YOO (John Hunter, NZ)**WITHDRAWN THIS YEAR****RAMALLAH 1Y-Y (Dr. John Reed, USA)**

Every bloom is fit to show. The blooms show just above the leaf tips with lasting power on the stem. Chosen to honor a fellow physician, Dr. Salous from Palestine. This is the name of his home town. A well balanced, pleasant show bloom. See photo on Daffnet from the Chicago 2013 show. Was Reed 93-1-23.
(Celtic Gold x Dream Prince) Early Midseason \$ 17.00

RANSOM 4YYW-P (Jackson's Daffodils, AUS)

The first of David's well-formed Y-P doubles. Fertile with stigma too. Very nice.
(Tavel x Daydream) Early Late Season \$ 8.00

RED ENVY 2W-R (Dr. John Reed, USA)

Because of Culmination's tall stem I used it almost exclusively in my early 2W-R crosses. After seeing Catalyst, I started using Magician more. Red Envy is the best from this cross for me. Much like Catalyst, it too is seed sterile here. The flower is a little brighter red. The flower usually lasts 5-6 days longer than Catalyst and is more rot resistant so far! It can be shown and has a strong, short neck with bright color that is non-fading. Was Seedling 95-14-1.
(Decoy x Magician) Early Midseason \$14.00

REFRAIN 2W-P (Grant E. Mitsch, USA)

Tall strong stems support a well-balanced 2 W-P with reddish tones to the cup (color variable) Smoother than Cool Flame and a better show flower too. While the petals overlap they are not massive. Fertile, Scare.
(Romance x Cool Flame) Late Midseason \$ 6.00

RIVER CROSSING 3W-Y (Dr. John Reed, USA)

From a cross to develop a 3W-P comes a vigorous high quality 3W-Y. Greatly admired by Cynthia Haeffner. Stock is ample and every bloom can be shown. Parentage is similar to the pollen parent of Brooke Ager. Named for a new foot bridge at my alma mater that crosses the St. Joseph River between the school and its first ever student housing.
 Was Reed 81-123-1.
(Coral Light x My Word) Late Midseason \$ 6.00

RED PASSION 2W-R (Dr. John Reed, USA)

These flowers stand tall on strong stems with excellent poise. The overlapping petals give a round appearance and the bowl shaped cup is a nice shade of bright red. This is my best show quality early red-pink to date. On seeing it one can understand how it got its name! Was Reed 98-179-1. Listed again as it has increased well.
[88-93-5 (Evan's W2 x Magician) x Celestial Flame] Midseason \$28.00

RHEBAN RED 2Y-O (James Radcliff, AUS)

A large, vigorous, early, show flower. One of the best in Australia with many show awards and a good breeder. Usually paler here. Never offered in the Northern Hemisphere until released by Oakwood.
(Breeding unknown) Early Midseason \$ 7.00

ROCKNE 2Y-Y (Dr. John Reed, USA)

Knute Rockne was the most outstanding football coach that the University of Notre Dame ever had. I grew up in the shadow of the school's Golden Dome. I have had the pleasure to work with one of his nieces, Josephine Copeland and this flower has been named to honor her and her family. A very imposing late all yellow of the highest show quality. The massive, overlapping major petals make this a division 2 instead of a 1. One of the finest late midseason all-yellow daffodils for show and garden. Was Reed 85-7-3.

(Golden Jewel x Dream Prince) **Late Midseason** **\$ 9.00**

RORY'S GLEN 2O-O (Carcairn Daffodils, N. IRE)

Really brightly colored all orange show flower with tall stems and flat perianth. Excellent breeder. Can be susceptible to rot.

(Bunclody x Fireraiser) **Midseason** **\$ 5.00**

ROSE LAKE 2W-P (Grant E. Mitsch, USA)

For show and garden. Vigorous.

[(Easter Moon x Cool Flame) x Pink Silk] **Midseason** **\$ 4.00**

ROSEVINE 3Y-WPP (John Pearson, ENG)

Best available show quality 3Y-P. Good breeder and healthy.

(Eastermoon x Seedling) **Late Midseason** **\$ 7.00**

ROYAL MARINE 2W-YOO (J. Lea, ENG)

Outstanding for show and garden. Tall stems. Vigorous.

(Colly Gate x Ibberton) **Midseason** **\$ 4.00**

RUBY RED 2W-R (Dr. John Reed, USA)

The name says it all. Inspired by Dorothy's slippers in the Wizard of Oz and the intense color that is easily visible at a distance, a brilliant ruby-red. Vigorous, rot resistant and somewhat rough, it is passing this color on to its seedlings. Some of these with Culmination have a warm pink perianth. Good stock due to retention for breeding, giving 2 Y-Ps, too. Far better stem and poise than Spaceship. This is the parent of Millennium Red. Was Reed seedling 81-176-1.

(Spaceship x Duncan seedling) **Late Midseason** **\$ 4.00**

SABINE HAY 3O-O (D. Milne, ENG)

The most fantastically self-colored exhibition flower available. The tall stems support a well-rounded perianth of orange and a deeper colored cup. Protect from the sun!

(Seedling x Seedling) **Late Midseason** **\$ 4.00 or 3/\$ 10.00**

SAMSARA 3Y-YRR (Clive Postles, ENG)

A very smooth but usually paler show flower here. It breeds very smooth show blooms.

(Achduart x Stanway) **Late Midseason** **\$ 5.00**

SANDYCOVE 2Y-GWP (B.S. Duncan, N. IRE)

A vigorous show flower and breeder. The perianth opens white and quickly transitions to yellow. Excellent breeder. Almost a division 3.

(Pismo Beach x High Society) **Late Season** **\$ 5.00**

SATCHMO 1YYW-W (John Pearson, ENG)

The Trumpet on this flower is oversized, making its presentation more dramatic, like the trumpet held by Louie Armstrong when he's performing on stage. Takes several days to whiten up completely. Excellent presentation and petal overlap. A show flower that is showy! Not offered before at Oakwood. Scarce.

(Carb Gipsy x Lemon Snow) **Midseason** **\$ 14.00**

SHEELAGH ROWAN 2W-W (John Pearson, ENG)

Many show awards in the United Kingdom, for this outstanding, very white daffodils. With strong stems excellent poise and smooth petals with great overlap.

(Stoke Charity x Panache) **Late Season** **\$ 8.00**

SHIPSHEWANA 3Y-Y (Dr. John Reed, USA)

One of the first generation progeny from Haunting to be named. It is a very strong growing quality show flower. Very smooth. Every bloom is fit to show and also grows well in the garden. Named for a local Amish community in Indiana. Was Reed Seedling 99-24-2.

(Getaway x Haunting) Late Midseason \$ 34.00

SIMPLY STUNNING 1Y-Y (Dr. John Reed, USA)

Combining the size of Arkle and the smoothness of Dream Prince, this flower took Spud Brogden's eye when it was at the National Show. Its stem is strong with a good upward presentation. It is a slow increaser but healthy and a good parent. It was the only selection kept of 2 years of crosses. Finally released but the stock is still small. Was Reed seedling 90-12-1.

(Arkle x Dream Prince) Midseason \$ 18.00

SITTING BULL 1Y-R (Dr. John Reed, USA)

When I first saw this in flower, I could hardly believe its parentage. It was the best well-colored red show trumpet I had seen here. It makes a smaller bulb but increases well. Named for an American Indian that stayed on the yard of my grandmother Rough's sod hut when she was a little girl after the Oklahoma Land Rush. Stock is small. See DaffSeek for photo. Was Reed Seedling 2001-54-1.

(Uncle Duncan x American Revolution) Midseason \$ 60.00

SMOKEY BEAR 4Y-O (B.S. Duncan, N. IRE)**WITHDRAWN THIS YEAR****SMOOTH TRUMPET 1W-Y (Charles, Wheatly, USA)**

Its name says it all. The wide, white, overlapping petals are very smooth. The light-yellow trumpet is long and elegantly shaped. Poise, stem and neck are excellent. It is still very rare. I have been building up my stock for over 10 years. A show flower of the highest caliber. Small stock.

(Breeding unknown) Midseason \$ 18.00

SOME FIRE 4W-O (Colin Crotty, NZ)

This double is easy to recognize with its intense white color and an orange color that is usually red here. It rapidly increases so it can be divided every few years. Stems are strong and poise is excellent. Very striking.

(Gay Time x Eclat) Late Midseason \$ 15.00

SOPRANO 2W-GPP (B.S. Duncan, N. IRE)**WITHDRAWN THIS YEAR****STOKE CHARITY 2W-W (John Pearson, ENG)**

John's breeder for his white daffodils. It has very smooth overlapping petals on tall strong stems. With excellent poise. Scarce

(Easter Moon x Rashee) Midseason \$ 8.00

STRAWBERRY SHORTCAKE 3W-P (Dr. John Reed, USA)

My first division 3W-P of good quality, and it breeds well. Color varies from reddish to pale pink. For show and garden. Fertile. Was 84-171-1.

(Pismo Beach x Everpink) Late Midseason \$ 8.00

SUPER HERO 2W-R (Dr. John Reed, USA)

A proven parent and good garden flower with strong tall stems that consistently hold well-colored large blooms. In 2006 its offspring gave me the largest and best formed strong red colored division 2 seedling of trumpet character that I have seen. This seedling is truly a Super Hero. Was Reed 92-170-1.

(Ken's Favorite x Magician) Late Midseason \$ 5.00

TABOR HILL 2W-P(O) (Dr. John Reed, USA)

Displaying outstanding show form and it has a unique orangish-pink cup color. This attractive corona has a slightly rolled lip. It has been very healthy and is increasing well. Fertile both ways. Other pinks with orange hues are coming on here and are being bred with it, including a full trumpet from red-pink breeding. In the tradition of its seed parent, it is named for a local southwestern Michigan winery. Rated highly by several ADS judges. See the photo in DaffSeek.

(Cabernet x Verran Rose) Midseason \$ 20.00

TANAGER LANE 8W-O (Dr. John Reed, USA)

Until this selection flowered I had come to believe collecting o.p. Matador seed was not useful. Through the years this selection has developed into an improvement over Matador. The lighter petals qualify it as a definite 8W-O and the flowers are nicely formed and "fertile". A very large bulb can have up to 8 florets on it. I should start to flower seedlings from it this year. Dr. Frank Gaylon was interested enough to inquire about it and was given a bulb before his stroke and death. Named in his honor for his home address. Stock small. Was Reed 84-212-1.

(Matador open-pollinated) Midseason \$ 16.00

TANGERINE DELIGHT 1W-O (Dr. John Reed, USA)

First flowering in 2004, it was an eagerly awaited outcome from my 25 year effort to breed strong vigorous show quality white orange trumpets in my climate. This cross gave many nice flowers in division 1 and 2 but Tangerine Delight is the best. It is well-formed, has large flowers that are held on strong tall stems with excellent poise. The overlapping flat perianth segments are very white and its flared trumpet is a delightful shade of tangerine orange. Jason Delaney's photos taken in 80 degree heat says it all. Great!! Fertile both ways. Stock is still small with only 3 or 4 to go this year. Was 98-32-2.

(Orange Tint x Lutana) Early Midseason \$ 50.00

TANZEY GIRL 2W-OOY (Spud Brogden, NZ)

One of the most outstanding daffodils grown at Oakwood with vigor, health, tall stems and color. An excellent breeder and very distinctive too.

[(Motif x Avenger) x Crimpeline] Late Midseason \$ 8.00

TARNISHED GOLD 2Y-Y (Dr. John Reed, USA)

Until I first saw this daffodil in flower in 1990 the word golden daffodils could only conger up an intense yellow bloom. But this flower truly is a golden color hence its name. Planted adjacent to Goldfinger for a few years it made that flower seem pale! Would be a trumpet except for its huge perianth inherited from Gold Convention. Breeding deeper color. Can be shown. Formerly Reed 83-36-1.

(Temple Gold x Gold Convention) Midseason \$ 7.00

THREE OAKS 1W-Y (Dr. John Reed, USA)

A very consistent show flower and breeder of the highest quality. with a smooth overlapping perianth that has a light yellow corona. An awesome breeder and show flower. Was Seedling 89-21-1.

(Bravoure x Pops Legacy) Midseason \$ 10.00

THUNDER ROLL 1Y-R (Dr. John Reed, USA)

WITHDRAWN THIS YEAR

TAVEL 1W-GPP (J. Gerritsen and Son, HOL)

A vigorous, really pretty pink trumpet. Primarily for garden. Free flowering here from bulbs down 24 years here. Strong stems hold blooms well above the leaves. Petals overlap well. Alpine Glow is probably the pollen parent. Flowers are large.

(Pink Beauty x Seedling) Midseason \$10.00

TROPICAL HEAT 2Y-R (B. S. Duncan, N. IRE)

An outstanding, well-colored smooth show flower. Scarce.

[Garden News x (Bunclody x Barnesdale Wood)] Late Season \$ 6.00

TRUMPET WARRIOR 1YYW-WWY (Grant E. Mitsch, USA)

For garden and show with tall stems, and excellent flowers. Poise is very good, too.

(Chiloquin x Arctic Gold) Midseason \$ 4.00

TURK 1Y-O (Dr. John Reed, USA)

Very scarce, slow grower. Very smooth and its color can be strong. Great breeder. Was Seedling 81-30-7.

(Larch Mountain x Sutton Court) Early Midseason \$ 12.00

TUSCORORA 1Y-Y (Dr. William Bender, USA)

WITHDRAWN THIS YEAR

VALEDICTION 3W-GWW (Helen Richardson, IRE)

Older show flower. Still very good, with large blooms on tall stems.

(Verona x Benediction) Late Midseason \$ 4.00

VALLEY MOON 1YYW-Y (Colin Crotty, NZ)

I'm attracted to very pale yellow flowers and this is one of the best I've seen. For practical purposes there is no white halo seen here. Very large blooms are held on strong stems, excellent poise! A wide smooth flat perianth graces a tubular trumpet that expands at its opening. Great Flower!!

(Breeding unknown) Midseason \$ 20.00

VERA ROBBINS 3W-GWW (Dr. John Reed, USA)

Named for my wonderful mother-in-law. This is my best show 3W-W. Very round blooms are held high on tall stems. A healthy plant. Was Reed seedling 85-100-2.

(Verona x Achnasheen) Early Late Season \$ 10.00

VERNAL PRINCE 3W-GYY (Tom Bloomer, N. IRE) WITHDRAWN THIS YEAR**VICKIE LINN 6Y-P (Dr. John Reed, USA)**

Similar to First Born but smaller, smoother, shorter and paler. Colors can be intense at times. The cup is short. Petals are swept back gracefully. Fertile. Named for a nurse I worked with, who is short and had intense blond hair and ruddy cheeks. Not offered for a while. Excellent show flower. Was Reed seedling 81-101-1.

(Little Princess x Milestone) Midseason \$ 12.00

WARM DAY 2O-O (Carncairn Daffodils, N. IRE)

An intensely colored intermediate with strong, tall stems.

(Stylish x Rory's Glen) Midseason \$ 6.00

WAYNE'S WORLD 6Y-O (Dr. John Reed, USA)

In 1984 some of the N. cyclamineus pollen was applied to Monal. Only a few seeds were collected and 3 seedlings germinated. They have been very slow growing but healthy. And worth the wait. Its wide, overlapping, smooth and reflexing perianth is the perfect foil for the symmetrical glowing medium sized cup. It has won a number of awards under seedling number. The blooms are of medium size. The late Wayne Steel of California liked Monal (its seed parent) enough that I had to dig a lot of bulbs of it for him to pot up and pre-cool to give to potential new ADS members. When the bulb of 84-49-1 first flowered for him, he was excited enough to send an e-mail photo to us. In the same e-mail files downloaded that day we learned we were going to be grandparents. As Monal and this offspring were a small but exciting part of his world, it seemed appropriate to register it as Wayne's World. Also with the thought of the recent pop movie by the same name. Few to go. Was Reed 84-49-.

(Monal x N. cyclamineus) Early Season \$15.00

WEBER'S ELECTRIC 2Y-R (Dr. John Reed, USA)

This electrifying bloom really stands out in the garden. The trumpet-shaped corona usually is a blazing red-orange that shouts out even at a distance. The stem is strong and holds the bloom up-facing with the overlapping perianth serving as an excellent foil for the corona. It seemed appropriate to name it for the business of our friendly electrician Mike Weber who has contributed so much to Oakwood. Was Reed 84-144-2. For show and garden. **DaffSeek photos do not do it justice!**

(Bunclody x Wildfire) Midseason \$ 8.00

WESTMINSTER PINK 2W-P (Dr. John Reed, USA)

This flower was in bloom in April when the royal wedding took place in Westminster Abbey. It was named to honor that event. Grown for many seasons, it consistently has given good-sized blooms on tall strong stems with excellent smooth, overlapping petals of pure white and a trumpet shaped cup of a pure light pink. Was Reed seedling 93-20-1.

(Breeding unknown) Early Midseason \$ 9.00

WINDY CITY 1W-Y (Dr. John Reed, USA)

At the 2009 National ADS Show at the Chicago Botanical Garden, this daffodil under seedling number received five awards including The White Ribbon and the Rose Ribbon for Best Seedling in the show. The White Ribbon "set of three" graced the cover of the June 2009 ADS Journal. Tall strong stems support very wide smooth white petals and a gently flared bright yellow trumpet. The neck is short and poise is excellent. Combining the best features of both parents, it is the logical progression in breeding my ideal 1W-Y. It is a very pleasing, consistent, healthy show flower. To honor the Chicago National ADS Show, Bob Spotts suggested the name "Windy City" Was Reed 97-163-1. Limited Stock.

(Irish Affair sibling x Three Oaks) Early Midseason \$ 50.00

ROYAL HORTICULTURAL SOCIETY SYSTEM OF DAFFODIL CLASSIFICATION

The classification of daffodils has changed many times over the years. The present system combines the RHS classification of thirteen divisions based on form and species heritage with Dr. Throckmorton's color coding from the American Daffodil Society. This combined system gives us a very useful tool for describing daffodils quickly. A single letter denotes a color and its appropriate location as found in the flower, first in the perianth and then in the corona. W=White Y=Yellow G=Green O=Orange R=Red P=Pink

For example: Arctic Gold is classified as a 1Y-Y. It is a trumpet daffodil with yellow petals and a yellow corona. Misty Glen is classified as a 2W-GWW. It is a large-cupped daffodil with white petals and a green-eyed white cup. First Born classified as a 6Y-GYP. It is a cyclamineus hybrid with swept-back, yellow petals and the corona has a greenish eye with a small transition of light yellow going to a deep pink color extending to the edge of the cup.

- | | |
|-------------|--|
| Division 1 | Trumpet Daffodils: The trumpet (corona) is equal to, or longer than, the petal (perianth) segments. |
| Division 2 | Large-Cupped Daffodils: The cup (corona) is less than the length of the petals (perianth) but more than a third. |
| Division 3 | Small-Cupped Daffodils: The cup (corona) is equal to, or less than a third, of the petal (perianth) length. |
| Division 4 | Double Daffodils: This division is for all forms of double flowers where there is more than one set of petal or coronal segments, or both. |
| Division 5 | Triandrus Daffodils: hybrid daffodils that predominate with <i>N. triandrus</i> characteristics. |
| Division 6 | Cyclamineus Daffodils: hybrid daffodils that predominate with <i>N. cyclamineus</i> characteristics. |
| Division 7 | Jonquilla Daffodils: hybrid daffodils that predominate with <i>N. jonquilla</i> characteristics. |
| Division 8 | Tazetta Daffodils: hybrid daffodils that predominate with <i>N. tazetta</i> characteristics. The stems usually will have multiple flowers. Also known as poetaz daffodils. |
| Division 9 | Poeticus Daffodils: hybrid daffodils that predominate with <i>N. poeticus</i> characteristics. |
| Division 10 | Bulbocodium Daffodils: hybrid daffodils that predominate with <i>N. bulbocodium</i> characteristics. |
| Division 11 | Split-corona Daffodils: the cup (corona) that is split for more than a half of its length. This division has two subdivisions: |
| 11a: | Collar Daffodils have the corona segments opposite to the perianth segments. |
| 11b: | Papillion Daffodils have the corona segments alternating to the perianth segments |
| Division 12 | Miscellaneous Daffodils: those that cannot be classified within the preceding divisions. |
| Division 13 | Species Daffodils: those distinguished solely by botanical name—the wild ones. |

LARRY WIER'S DAFFODILS 2015

My daffodil friend, Larry Wier, who has been breeding and selecting seedlings for 20 years, offers the following introductions. His standards are very high and you can be sure that his flowers are superior, distinctive, and healthy. He has acquired some of Charles Wheatley's stocks and is introducing them, as well.

THE BULBS LISTED BELOW ARE POST-PAID FROM LARRY. ORDERS FOR THEM AND PAYMENT BY CHECK SHOULD GO TO LARRY WIER, 13469 NORTH MAIN ROAD, BUCHANAN, MI 49107-9149, USA. Larry's phone is: (269) 695-6486.

ANIMAL CRACKERS 2YYW-WWY (Larry Wier, USA)

This name was chosen from the Marx Brothers as only they would mix sweets and liquor, the parents of this beautiful bloom. The perianth segments are very round and large. The medium sized cup expands slightly to the mouth where it is flanged. As with most reverses, it opens all yellow and takes time to mature with the small yellow rim. A show flower. Was seedling 88-2. Resists rot well so far.

(Lemon Candy x Gin and Lime) Midseason post-paid \$10.00

ELEGANT TOUCH 2W-W (Larry Wier, USA)

A beautiful, rounded and true white perianth are the best characteristics of this medium to large flower. Inner petals are spade shaped and smooth. Corona tends to be short and flaring with a crinkled edge. Tends to be a good early white. Was seedling # 89-4.

(Brierglass x Rhapsody) Early Season post-paid \$10.00

FLASHPOINT 1W-P (Larry Wier, USA)

The white perianth with ovate segments of good substance are the background for a trumpet that tapers gradually making for a more massive corona. This trumpet is darker pink inside and has a fairly heavy frill at the mouth. A climate milder than Michigan's will result in bigger and better colored flowers. A vigorous grower here (This was the "flash point" that Larry needed to start registering his daffodils. Almost a red-pink in the best of years—JR)

(Magician x Melancholy) Midseason post-paid \$ 10.00

MAKER'S MARK 1Y-O (Larry Wier, USA)

This is Larry's most successful cross so far to get a better colored show flower here in the orange trumpets. The strong yellow color of the overlapping perianth is a good foil to the cylindrical shaped corona with little expansion of the trumpet. The perianth is not starry nor widely overlapping but very pleasing. The stems are tall and strong with bulbs having good increase. Breeding both 1 and 2 Y-Os. A well-grown specimen won the Single Bloom 1 Y-O class at the National ADS Show in St. Louis, beating Magic Lantern. Was Wier 87-1. Proving to be a good parent for Peter Ramsay.

(Glenfarclas x Trumpet Call) Midseason post-paid \$ 7.00 or 3 for \$15.00

MERLIN'S PAL 3W-YYO (Charles Wheatly, USA)

This flower is another tribute to Charlie's breeding skill. Blossoms are quite large, bigger than both parents. Tall flower stems in the field makes these bright showy blossoms easy to find. This division 3 small cup has size and beauty to spare. Was seedling 89-98-1.

(Merlin x Palmyra) Midseason post-paid \$ 12.00

MINERAL WELLS (previously WINTER MOON) 1W-Y (Larry Wier, USA)

This white perianth is quite rounded with spade-shaped segments (no double triangles here). The medium bright lemon trumpet has length to spare making for a good bicolor blossom. The corona is more narrow than average with a frill at the mouth. Color has been good in Michigan's climate. Was Seedling # 89-3

(Tudor Dance x Helsal) Midseason post-paid \$ 9.00

MONGO 1 Y-P (Charles Wheatly, USA)

This name in the Miami-Illinois language means "In the loon land". Charlie lived in this Indiana town for several years. Name is pending. In '09, this bulb was a gratis in orders, so some growers will have it under seedling number of 09-1. Colors are pastel with outer petals touching making for a pleasant and artistic flower.

(Breeding unknown) Midseason post-paid \$ 10.00

N. assoanus (13Y-Y)

A species from Southern France and Eastern Spain that grows in limestone areas. Flowers are 1-3 in number on 10-12 stems. These are pot grown in heavy grit with a limey pH. This is the first of the jonquilla group to flower, mid-late season in Michigan. Blossoms are fragrant and well-formed despite Michigan's climate. Unknown as to how many will be available.

Mid/late season

post-paid \$ 20.00

OUTER RIM 1W-W (Larry Wier, USA)

This flower has inherited the best characteristics of both of its parents. Especially a true and pure white color. Inner petals are spade shaped and almost touching. The trumpet is expanding to a moderate flange that is slightly frilled. Is stocky in overall shape. This blossom was the real star of seven selections form this cross. Seedling number 91-4. Name is pending.

(Pitchroy x Lady Slim)

Midseason

post-paid \$ 10.00

PINK SUNDAY 2W-P (Charles Wheatly, USA)

The red-pink color of this bowl-shaped cup against the rounded and wide petaled perianth of this flower is its major attraction. Refrain as the seed parent has provided form. Artful as the pollen parent has added to a beautiful cup color. (Was Seedling # 91-82-13).

(Refrain x Artful)

Midseason

post-paid \$ 10.00
